 MODEL X20-A19S – 9' RACK SYSTEM WITH STANDARD WEIGHT STORAGE
 MODEL X20-A19E – 9' RACK SYSTEM WITH SIDE ENTRY WEIGHT STORAGE
 MODEL X20-A18SB – 8' RACK SYSTEM WITH STANDARD & BUMPER STORAGE
 MODEL X20-A19SB – 9' RACK SYSTEM WITH STANDARD & BUMPER STORAGE

CONSTRUCTION FEATURES:

UPRIGHTS – Constructed from 3" x 3" 7-gauge steel tubing, welded to 3" x 2" 7-gauge steel base tubes for maximum strength and stability.

SUPPORT – 3" x 3" 7-gauge angled steel supports are welded between the base and uprights to reinforce structure.

HOOK PLATES – ¾" nickel-plated hook plates with smooth edges are securely attached to the uprights using concealed hardware.

PROTECTION – ¼" high-impact plastic shields cover the front, inside, and back of each upright, offering superior protection against wear.

FINISH – All steel components—including uprights, bases, and supports—are sand-blasted and powder-coated for maximum paint adhesion and chip resistance.

SPOTTER PLATFORM – Powder-coated diamond plate platform provides added area for spotters and creates a seamless, gapless walkthrough rack when installed.

WEIGHT STORAGE FEATURES:

FRAME – Constructed from rolled 3" x 2" 7-gauge steel tubing, welded to a 3" x 2" 7-gauge steel base tube for structural integrity.

FINISH – Sand-blasted and powder-coated for durability and corrosion resistance; standard finish in wrinkle black.

CAPACITY – Designed to accommodate 2½ lb., 5 lb., 10 lb., 25 lb., 35 lb., and 45 lb. weight plates. Includes two vertical bar sleeves for barbell storage.

PROTECTION – Plate storage arms are fitted with ¼" plastic sleeves and rubber bumpers to protect both the rack and the plates from wear and damage.

X-20 RACK SYSTEM INCLUDES:
