- HJ Landing Areas: 1250, 1300, 1325, 1360, 1380, 1390, & 1400

HIGH JUMP LANDING AREA

MODEL 1250

MODEL 1250

16'6" W x 10' L x 26" H
5.02 m. x 3.04 m. x 66 cm.

ADD ON: Weather Cover

MEETS AND EXCEEDS ALL NFHS AND NCAA REGULATIONS.

LIFETIME GUARANTEE:

All handles and straps. Handles are 2-inch 3500 T.C. nylon webbing encased in 37 oz. equivalent rip-stop vinyl. Handles are sewn to side of pit below zipper flap. Triple reinforced.

15-YEAR GUARANTEE:

Seams and hems are covered against defective material and workmanship. If problems occur during normal use, UCS will repair at no charge or provide materials to repair the area applicable to Top Pad Mesh or Vinyl on base units.

UCS VINYL MATERIALS:

Sides and bottoms of all units manufactured out of 21 oz. knife-coated vinyl composed of 5 oz. 840 denier nylon with a 23 x 23 construction and 16 oz. of liquid coated urethane that is spread over one side of the nylon material. Results in a 37 oz. equivalent rip-stop vinyl that has the highest tear strength in the industry and the most vinyl on the exposed side.

SEAMS AND HEMS:

Double-stitched, double-folded, and double-stitched again with high tenacity 232 polyester thread, with at least five stitches to the inch and no more than six stitches.

FOAM CONSTRUCTION:

New honeycomb urethane foam combines three densities and three compressions in unique lattice configuration.

VTX 1000 SYSTEM:

Exclusive 8" wide Velcro with a 37 oz. equivalent rip-stop vinyl backing holds base units and front units together. Takes stress off the Top Pad.

SPIKE RESISTANT BREATHER FABRIC:

1000 denier 14 x 12 PVC extruded fabric.

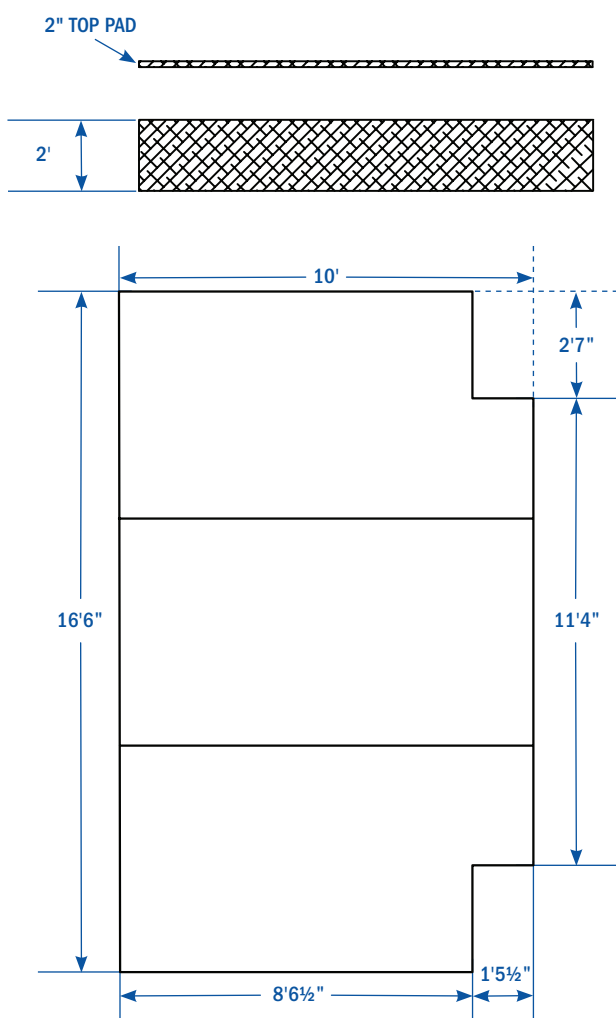

2" Foam Top Pad is Standard: Holds entire pit securely in place. Provides safe comfortable landings. Prevents landing between the units.

SAFETY CUT-OUTS:

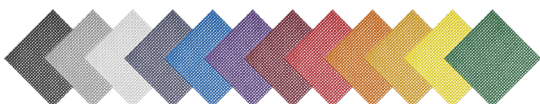

All UCS High Jump Pits have cut-outs for High Jump Standards.

WEATHER COVER ADD ON:

21 oz. UV-Inhibited Vinyl coverage over the high jump and secures with clips to base pads. Double-reinforced Sunstop® coated thread increases life span.
