BASE VINYL

*White vinyl is available for weather cover only.

MEETS AND EXCEEDS ALL NFHS & NCAA REGULATIONS

LIFETIME GUARANTEE:

All handles and straps. Handles are 2-inch 3500 T.C. nylon webbing encased in 37 oz. equivalent rip-stop vinyl. Handles are sewn to side of pit below zipper flap. Triple reinforced.

15-YEAR GUARANTEE:

Seams and hems are covered against defective material and workmanship.

ANGULAX 3013:

Exclusive integration system allows front units to be placed on the box collar, providing a level landing area. Patent pending vault box collar system integration with all UCS landing areas, features a cut-out for placing the box collar, the front units, and extensions allow for a flat landing area that is exclusive to UCS.

UCS VINYL MATERIALS:

Sides and bottoms of all units manufactured out of 21 oz. knife-coated vinyl composed of 5 oz. 840 denier nylon with a 23 x 23 construction and 16 oz. of liquid coated urethane that is spread over one side of the nylon material. Results in a 37 oz. equivalent rip-stop vinyl that has the highest tear strength in the industry and the most vinyl on the exposed side.

SEAMS AND HEMS:

Double-stitched, double-folded, and double-stitched again with high tenacity 232 polyester thread, with at least five stitches to the inch and no more than six stitches.

FOAM CONSTRUCTION:

New honeycomb urethane foam combines three densities and three compressions in unique lattice configuration.

VTX 1000 SYSTEM:

Exclusive 8" wide Velcro holds base and front units together. Takes stress off the Top Pad and snap hooks while keeping the pit intact, and minimizing separation.

SPIKE RESISTANT BREATHER FABRIC:

1000 denier 14 x 12 PVC extruded fabric.

2" FOAM TOP PAD (STANDARD):

Holds entire pit securely in place. Provides safe comfortable landings. Prevents landing between the units.

COACHES BOX:

8' x 10' Coaches box outlined with 5" vinyl – sewn directly onto the top pad to visually enhance the landing zone.

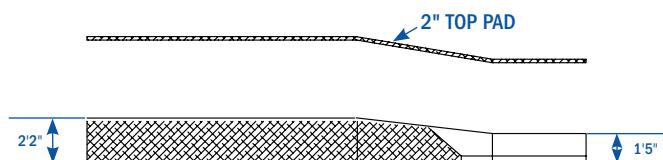

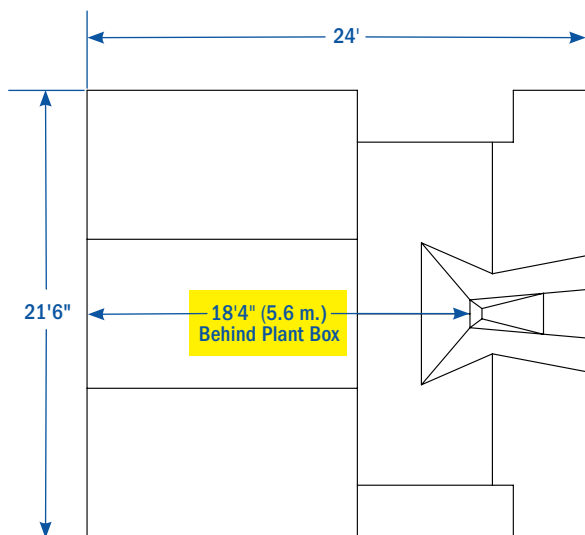

WEATHER COVER ADD ON:

Coverage includes pit, base protection pads and vault box. Double-reinforced Sunstop® coated thread increases tear strength throughout.

MODEL 1700

21'6" W x 24' L x 28" H
(6.6 m. x 7.3 m. x 71 cm.)
