POLE VAULT STANDARDS

- GOLD SERIES
- INTERNATIONAL SERIES
- ULTIMATE 6300 & 6500

GOLD SERIES POLE VAULT STANDARDS WITH BASE PROTECTION PADS

UPRIGHTS: The UCS Gold Series Pole Vault Standards are crafted with uprights made from semi-hollow anodized aluminum extrusions, combining durability and reduced weight. Measuring 3½" wide by 2½" deep with a ⅜" wall thickness, the robust semi-hollow extrusion encloses a movable upright for seamless operation. Each upright includes built-in 3' extenders and features a quick-set adjustment system, delivering precise and secure height adjustments to meet the rigorous demands of athletes and coaches.

BASE: The base of the UCS Gold Series Pole Vault Standards is fabricated from #7 galvanized steel, providing 100% rust resistance for long-lasting durability. Its heavy weight, combined with the extremely rigid upright, ensures absolute stability during use, even under the demands of high-performance training and competition.

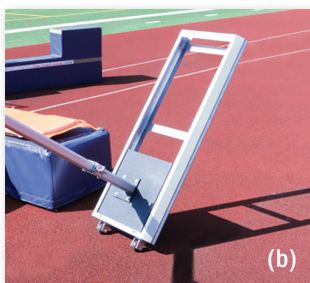

OFFSETS: The offsets of the UCS Gold Series Pole Vault Standards are powder-coated in optic yellow, providing maximum visibility. This vibrant color ensures that the standards are easily seen, even in low-light conditions, enhancing safety and convenience for athletes and coaches.

HEIGHT ADJUSTMENT: Features a height adjustment system that is easily readable in both imperial and metric measurements. Adjustments are made by simply turning the knob and moving the accu-glide system, ensuring smooth and precise changes. The [quick-set adjustment system \(a\)](#) then securely locks the upright in place, providing stability and reliability during use.

RUNNING SYSTEM: Allows the uprights to slide forward and backward to the desired position, providing customizable placement for pole vault setups. The standards are securely fixed within the runway system, and the [tilt'n roll base \(b\)](#) enables easy transport, making setup and relocation efficient and hassle-free.

REGULATIONS: Meets or exceeds all NFHS rules and regulations.

GUARANTEE: Backed by a 10-year guarantee against defects in workmanship and materials, ensuring long-term reliability and peace of mind.

MODEL 510-0817 – 5' - 17' (1.53 m. - 5.18 m.)

MODEL 510-1021 – 7' - 21' (2.34 m. - 6.4 m.)

MEETS AND EXCEEDS ALL NFHS, NCAA, & USATF REGULATIONS

DELUXE BASE PROTECTION PADS:

One pair included with both models (standard or angle protection pads).

POLE VAULT EXTENDERS:

One pair included with both models; lowers height by 3 feet for beginners and novice vaulters.

15-YEAR GUARANTEE:

Backed by a long-term warranty on pole vault standards.

UPRIGHT CONSTRUCTION:

5½" wide x 2½" deep extruded aluminum with ⅜" wall thickness; semi-hollow design encloses the movable upright.

BASE CONSTRUCTION:

Fabricated from #7 galvanized steel for 100% rust resistance; heavy base and rigid upright provide unmatched stability.

OFFSETS:

Powder coated in Optic Yellow for maximum visibility.

HEIGHT ADJUSTMENT:

Easy-to-read markings in both imperial and metric measurements.

ACCU-GLIDE SYSTEM:

Smooth adjustment by turning the knob and sliding to desired height.

BASE PROTECTION PADS:

Rigid 90" x 32" x 17" treated wood framework fully enclosed in high-density graphite foam, wrapped in 37 oz. equivalent rip-stop vinyl.

RUNWAY SYSTEM:

Allows uprights to slide forward and backward to the desired position; alignment made easy with Velcro-backed vinyl strip; adjustable braking system prevents movement in windy conditions.

BUILT FOR GRAND PRIX EVENTS. ENGINEERED FOR EVERYDAY DURABILITY.

The UCS Ultimate 6300 and 6500 Pole Vault Standards are designed to deliver elite-level performance while withstanding the rigors of daily training and competition. Both models offer smooth, reliable adjustments, long-term durability, and the precision engineering that UCS is known for worldwide. Backed by our famous 10-year guarantee, these standards combine strength, accuracy, and ease of use to elevate every vaulting experience.

FEATURES & BENEFITS

HEIGHT ADJUSTMENT:

Ranges from 6'6" (1.98 m.) to 21' (6.4 m.) with quick, easy operation.

CROSSBAR DEPTH ADJUSTMENT:

Exclusive 0-80 cm range keeps standards securely fixed in place.

LOCKING SYSTEM:

Ensures accuracy between jumps.

ALUMINUM UPRIGHTS:

Engineered for maximum strength, accuracy, and stability.

DURABLE CONSTRUCTION:

Built for daily use and trusted for major events..

BASE PROTECTION PADS:

Specially designed angled pads ensure stability and can feature custom graphics.

MODEL DISTINCTIONS

ULTIMATE 6500:

Features the UCS-EASY-RISE Mechanism for height adjustment, UCS-EASY-GLIDE Mechanism for depth adjustment, and convenient eye-level readouts with locking zero marker.

ULTIMATE 6300:

Provides the same height and depth adjustment range with a trolley base system for smooth positioning.
